## NOTES

### STAGE 2 PROFILE

- New, high performance cam cores with stock base circle.
- Factory hydraulic bucket profiles.
- Works well with stock valve springs/retainers.
- Requires mild tuning for optimal performance.
- Requires BRP #529036272 crank locking tool for proper install.

BC does not recommend using synthetic oil during break-in or operation. Follow OEM manufacturer's torque sequence and specifications. Use liberal amount of aftermarket engine assembly lube during installation. Check follower or bucket surfaces for abnormal wear and/or scuffing. On initial start-up and break-in run engine at 1500-2500 rpm for 20 minutes. **Camshafts damaged by improper installation, excessive spring pressure or retainers contacting valve guides or seals are void from warranty. Not legal for sale or use on emission controlled motor vehicles.**
